PATENT AND TRADEMARK OFFICE NOTICES

Patent Cooperation Treaty (PCT) Information

For information concerning PCT member countries, see the notice appearing in the *Official Gazette* at 1142 O.G. 66, on Sept. 29, 1992.

For use of the European Patent Office as an International Searching Authority for international applications filed in the United States Receiving Office, see the notice appearing in the *Official Gazette* at 1022 O.G. 52, on Sept. 28, 1982.

For use of the European Patent Office as an International Preliminary Examining Authority for international applications filed in the United States Receiving Office, see the notices appearing in the *Official Gazette* at 1080 O.G. 2, on July 7, 1987 and at 1091 O.G. 2, on June 7, 1988. There is no longer a limit on the number of such international applications accepted for international preliminary examination by the European Patent Office; see the notice appearing at 1116 O.G. 32, on July 17, 1990.

The search fee of the European Patent Office was changed on Oct. 1, 1992, due to changes both in the amount of the international search fee charged by the European Patent Office and in the exchange rate of the U.S. dollar to the German mark, and was announced in the *Official Gazette* at 1142 O.G. 20, on Sept. 8, 1942.

International fees were changed on January 1, 1992, due to a decision of the Assembly of the PCT Union taken during its meeting from 23 September 1991 to 02 October 1991, and were announced in the *Official Gazette* at 1133 O.G. 98, on Dec. 24, 1991.

Certain domestic PCT fees and charges for International Search and Preliminary Examination have been changed effective Oct. 1, 1992 and were announced in the *Official Gazette* at 1141 O.G. 68 on Aug. 25, 1992.

The current schedule of PCT fees (in U.S. dollars) is as follows:

Sept. 4, 1992

DOUGLAS B. COMER,
Acting Assistant Secretary and Acting Commissioner of Patents and Trademarks.

Notice of Maintenance Fees Payable

Title 37, Code of Federal Regulations, Section 1.362(d) provides that maintenance fees may be paid without surcharge for a six-month period beginning 3, 7, and 11 years after the date of issue of patents based on application filed on or after Dec. 12, 1980. An additional six-month grace period is provided by 35 U.S.C. 41(b) and 37 CFR 1.362(e) for payment of the maintenance fee with the surcharge set forth in 37 CFR 1.20(h), as amended effective Dec. 16, 1991. If the maintenance fee is not paid in a patent requiring such payment the patent will expire on the 4th, 8th or 12th anniversary of the patent.

Attention is drawn to the patents which were issued on October 3, 1989 for which maintenance fees due at 3 years and six months may now be paid. The patents have patent numbers within the following ranges:

Utility Patents 4,870,705 through 4,872,214
Reissue Patents based on the above identified patents.

Attention is drawn to the patents which were issued on October 1, 1985 for which maintenance fees due at 7 years and six months may now be paid. The patents have patent numbers within the following ranges:

Utility Patents 4,543,667 through 4,545,078
Reissue Patents based on the above identified patents.

No maintenance fees are required for design or plant patents.

Payments of maintenance fees in patents should be directed to "Commissioner of Patents and Trademarks, Box M. Fee, Washington, D.C. 20231."

For patents based on applications filed on or after December 12, 1980, but before August 27, 1982, patent owners must establish small entity status according to 37 CFR 1.27 if they have not done so and if they wish to pay the small entity.

The current amounts of the maintenance fees due at 3 years and six months and seven years and six months and eleven years and six months are set forth in 37 CFR 1.20(e)-(g), as amended Oct. 1, 1992, which are reproduced below:

37 CFR § 1.20 Post-issuance fees

(e) For maintaining an original or reissue patent, except a design or plant patent, based on an application filed on or after after Dec. 12, 1980 , in force beyond 4 years; the fee is due by three years and six months after the original grant:

By a small entity (§1.9f) $465.00
By other than a small entity $930.00

(f) For maintaining an original or reissue patent, except a design or plant patent, based on an application filed on or after Dec. 12, 1980 in force beyond 8 years; the fee is due by seven years and six months after the original grant:

By a small entity (§1.9f) $935.00
By other than a small entity $1,870.00

(g) For maintaining an original or reissue patent except a design or plant patent, based on an application filed on or after Dec. 12, 1980, in force beyond 12 years; the fee is due by eleven years and six months after the original grant:

By a small entity(§1.9(f)) $1,410.00
By other than a small entity $2,820.00

The amounts of the surcharges for paying the maintenance fee during the grace period or after the expiration of the patent are set forth in 37 CFR 1.20(h), and (i), which are reproduced below:

(h) Surcharge for paying a maintenance fee during the 6-month grace period following the expiration of three years and six months , seven years and six months, and eleven years and six months after the date of the original grant of a patent based on an application filed on or after Dec. 12, 1980

By a small entity (§1.9f) $65.00
By other than a small entity $130.00

(i) Surcharge for accepting a maintenance fee after expiration of a patent for non-timely payment of a maintenance fee where the delay is shown to the satisfaction of the Commissioner to have been unavoidable $620.00

Notice of Expiration of Patents Due to Failure to Pay Maintenance Fees

35 U.S.C. 41 and 37 CFR 1.362(g) provide that if the required maintenance fee and any applicable surcharge are not paid in a patent requiring such payment, the patent will expire at the end of the 4th, 8th, or 12th anniversary of the grant of the patent depending on the first maintenance fee which was not paid.

According to the records of the Office, the patents listed below have expired due to failure to pay the required maintenance fee and any applicable surcharge.

[Docket No. 920670-2170]
RIN 0651-AA57
Changes in Procedures for Revival of Patent Applications and Reinstatement of Patents

Agency: Patent and Trademark Office, Commerce
Action: Notice of Proposed Rulemaking
Summary: The Patent and Trademark Office (Office) is proposing to amend the rules of practice in patent cases to: (1) modify the petition requirements for reviving abandoned applications; (2) extend the provisions for revival under the unintentional standards to applications abandoned under § 1.53(d); (3) modify the requirements for a petition to accept late payment of a maintenance fee filed more than six months after expiration of a patent; (4) modify the requirements for a petition to accept unavoidably delayed payment of a maintenance fee; and (5) provide for reinstatement of a patent where the delay in timely payment of a maintenance fee was unintentional, in the event that proposed statutory changes are enacted.
Dates: Written comments must be received on or before Nov. 13, 1992, to ensure consideration. An oral hearing will not be conducted.
Addresses: Address written comments to the Office of the Assistant Commissioner for Patents, Box DAC, Washington, D.C. 20231, marked to the attention of Abraham Hershkovitz. Comments may be sent by fax to the attention of Abraham Hershkovitz at (703) 305-8825.
For Further Information Contact: Abraham Hershkovitz by telephone at (703) 305-9282 or by mail marked to his attention and addressed to Office of the Assistant Commissioner for Patents, Box DAC, Washington, D.C. 20231.
Supplementary Information: Current regulations provide for revival of patent applications which were abandoned for failure to timely prosecute or failure to timely pay an issue fee under the unavoidable standard. In certain situations, patent applications can also be revived under the unintentional standard. A petition to revive under the unavoidable standard is subject to a requirement that the petition be filed promptly after the applicant is notified of, or otherwise becomes aware of, the abandonment. Under the unavoidable standard, any petition filed more than six months after the date of abandonment of the application must be accompanied by a terminal disclaimer disclaiming the period of abandonment. Promptness is not a requirement for petitions filed under the unintentional standard. The proposed change would encourage promptness in filing petitions to revive under the unintentional standard by requiring the filing of a terminal disclaimer when the period of abandonment exceeds six months. The Office calculates the period of abandonment as being the number of months from the date of abandonment until the date of filing of a grantable petition. The proposed change would require that, in a manner similar to the current practice under the unavoidable standard, a grantable petition under the unintentional standard would have to be filed within six months of the date of abandonment, or the requirement for a terminal disclaimer would have to be satisfied. As an example, a petition to revive, under the unavoidable or the unintentional standard, filed within two months from the date of abandonment, if grantable, would not require a terminal disclaimer. However, if the petition to revive is dismissed for a deficiency such as insufficient showing (for petitions under the unavoidable standard), or lack of a statement (for petitions under the unintentional standard), or lack of a sufficient petition fee, or lack of a proposed response, and a renewed petition to revive providing the lacking item is timely filed, but is filed more than six months after the date of abandonment, then a terminal disclaimer would be required.

Section 41 of title 35, United States Code, establishes fees that the Commissioner shall charge for patent-related matters. A bill to amend title 35 with respect to the late payment of maintenance fees has been introduced on June 4, 1992, in the House of Representatives as H.R. 5328 (hereafter, Bill). The Bill proposes to:

(1) amend 35 U.S.C. § 41(c)(1) to permit reinstatement of a patent which expired unintentionally for failure to timely pay the maintenance fee, provided that the payment is made within eighteen months after the six-month grace period specified in 35 U.S.C. § 41(b); and

(2) amend 35 U.S.C. § 41(a)(7) to require a petition fee for an unintentionally delayed payment for maintaining a patent in force.

The unintentional standard is not currently available for applications abandoned under § 1.53(d) (specifically excluded in § 1.137(b)) and patents expired for failure to pay a maintenance fee. The proposed changes (some of which hinge on enactment of the Bill) would expand the applicability of the unintentional standard to applications abandoned under § 1.53(d) and patents expired for failure to pay a maintenance fee.

In order to expedite implementation of the proposed legislative changes, the proposed amendments to the rules of practice

include proposals contingent upon enactment of the Bill. These changes are found in §§ 1.17(m), 1.378(a) and 1.378(c).

If the Bill is not enacted, the proposed changes to §§ 1.17(m), 1.378(a) and 1.378(c) will not include the changes proposed in the Bill regarding acceptance of late payment of maintenance fees, where the delay in payment was unintentional.

Discussion of Specific Sections to be changed or added:

(1) Patent application processing fees. (§ 1.17)

Paragraph 1.17(1) is proposed to be amended to provide for petition fees for reinstating a patent under the unavoidable standard in a manner similar to the fees charged for reviving an abandoned application or accepting delayed payment of an issue fee. In the event that the Bill is enacted, paragraph 1.17(m) is proposed to be amended to require a petition fee for reinstating a patent under the unintentional standard in a manner similar to the fee charged for reviving an abandoned application or for accepting delayed payment of the issue fee. These changes are proposed to ensure consistency with the proposed changes in § 1.378.

(2) Unavoidable or unintentional abandonment of an application

Sections 1.137, 1.155, 1.316 and 1.317 each provide for petitions to the Commissioner for relief from failure to timely comply with a requirement of the Office. Section 1.137 provides for petitions to revive patent applications abandoned for failure to prosecute where the delay in prosecution was unavoidable (§ 1.137(a)) or the delay was unintentional (§ 1.137(b)). Section 1.155 provides for petitions for acceptance of late payment of issue fees in applications for design patents as though no abandonment had ever occurred where the delay in payment was unavoidable (§ 1.155(b)) or unintentional (§ 1.55(c)). Section 1.316 provides for petitions for acceptance of late payment of issue fees in applications for patent as though no abandonment had ever occurred where the delay in payment was unavoidable (§ 1.316(b)) or unintentional (§ 1.316(c)). Section 1.317 provides for acceptance of late payment of the balance of issue fees in patents as though no lapse had ever occurred where the delay in payment was unavoidable (§ 1.317(b)) or unintentional (§ 1.317(c)).

In order to obtain relief under the unavoidable standard in the above-noted sections, the regulations require the filing of a terminal disclaimer if the petition is filed more than six months after the date of abandonment. See §§ 1.137(c), 1.155(d), 1.316(d) and 1.317(d). The terminal period to be disclaimed is a period equivalent to the period of abandonment. The period of abandonment is considered to be the number of months lapsed from the date of abandonment until the date of filing of a grantable petition.

Petitions filed under the unintentional standard in the above-noted sections have no express promptness requirement, nor a terminal disclaimer requirement. This has led, in many cases, to a practice contrary to the intent of the unintentional provisions. Applicants have often delayed filing a petition under the unintentional standard until close to the expiration of the one-year period. In other instances, applicants delayed filing a petition under the unintentional standard because they miscalculated the one-year period and this resulted in the applicant being unable to show that the delay was unavoidable or that relief was available under the unintentional standard. *In re Application of S*, 8 USPQ2d 1630 (Comm'r pat. 1988).

The proposed change to require terminal disclaimers for petitions under the unintentional standard filed more than six months after the date of abandonment will help to ensure that petitions are filed promptly after discovery of abandonment. The same degree of promptness is required regardless of whether the petitions are filed under the unavoidable or the unintentional standards. The requirement for a terminal disclaimer should not be viewed as a substitute for the requirement of prompt filing of a petition. See *In re Application of Takao*, 17 USPQ2d 1155 (Comm'r Pat. 1990); "Diligence in Filing Petitions to Revive and Petitions to Withdraw the Holding of Abandonment", 1124 *Off. Gaz. Pat. Office* 33 (March 19, 1991).

Sections 1.137(c), 1.155(d) and 1.316(d) are proposed to be amended to reflect the current practice that a terminal disclaimer filed for the purpose of reviving an application also applies to a patent granted on any continuing application entitled to the benefit of the filing date of the subject application under 35 U.S.C. 120.

Applicants may petition under the provisions of § 1.183 for a waiver of the requirement that a period equivalent to the period of abandonment be disclaimed if it can be shown that an extraordinary situation exists in which justice requires waiver of this requirement.

In situations where petitions under the above-noted sections were not grantable because of insufficient evidence submitted or petitioner's failure to comply with certain requirements, the Office dismissed those petitions with an indication as to the missing items and warned petitioners that if reconsideration was desired a renewed petition supplying the omissions had to be filed promptly. While the promptness requirement was not precisely defined, § 1.181(f) requires the filing of petitions within two months from an action complained of in order to avoid possible dismissal of the petition on the grounds that it was not timely filed. It is proposed that the above-noted sections be amended to specify a two-month period or such time as may be set in the dismissal as being the appropriate deadline for requesting reconsideration. In those situations where petitioners require more time to gather additional evidence or items needed for reconsideration, an extension of time of up to four months may be obtained under the provisions of § 1.136(a). The filing of a renewed petition within the period specified in the decision or within the extended period permitted under § 1.136 will satisfy the promptness requirement of petitions under the unavoidable standard. Upon failure to timely file a renewed petition under the unavoidable standard, the Office will require a showing of unavoidable delay for the entire period of abandonment. Upon failure to timely file a renewed petition under the unintentional standard, petitioner may be subject to a loss of the right to proceed under the unintentional standard if more than one year lapsed between the date of abandonment and the date the renewed petition is filed.

The unintentional provisions specified in § 1.137(b) will apply to applications abandoned under § 1.53(d). Effective November 5, 1990, the Commissioner waived, under § 1.183, the exception specified in § 1.137(b) as to applicability of petitions under the unintentional standards to applications abandoned under § 1.53(d). See "Petitions to Revive Patent Applications Waiver of Provisions of 37 CFR § 1.137(b)", 1121 *Off. Gaz. Pat. Office* at 6 (December 4, 1990). The proposed change in § 1.137(b) will incorporate this new practice into the regulations.

The Office adopted a policy wherein, under certain strictly limited conditions, the one-year period for requesting revival of an unintentionally abandoned application could be waived. Accordingly, the prohibition against requests for waiver found in § § 1.137(b), 1.155(c). 1.316(c) and 1.317(c) is proposed to be deleted. See "Petitions Under 37 CFR 1.183 to Waive the One Year Time Period Requirement in 37 CFR 1.137(b), 1.155(c) and 1.316(c)" at 1059 *Off. Gaz. Pat. Office* 4 (October 1, 1985). However, applicants are cautioned that waiver of the one-year deadline under the unintentional standard will continue to be subject to strictly limited conditions.

(3) Issue and term of design patents (§ 1.155)

Section 1.155 is proposed to be amended to be consistent with the proposed changes to § 1.137. Paragraph (b) of § 1.155 is further proposed to be modified to correct a typographical error. In the reference to fee section 1.17(1), the letter (l) should have appeared instead of the numeral (1).

(4) Application abandoned for failure to pay issue fee (§ 1.316)

Section 1.316 is proposed to be amended to be consistent with the proposed changes to § 1.137. Paragraph (b) of § 1.316 is further proposed to be modified to correct a typographical error. In the reference to fee section 1.17(1), the letter (l) should have appeared instead of the numeral (1).

(5) Lapse patents; delayed payment of balance of issue fee (§ 1.317)

Section 1.317 contains a provision regarding issue fees paid prior to October 1, 1982. Prior to that date, the Office charged an initial base issue fee and, depending on the size of the specification and drawings printed, billed applicants for a balance of issue fee due. Subsequent to October 1, 1982, all applicants were required to pay the same issue fee regardless of the size of the specification and drawings. Reference to the date in § 1.317 may be deleted at this point in time since it is no longer relevant to pending applications. However, practice under this section continues to be relevant when a fee change becomes effective before payment is received.

In order to satisfy the requirement of 35 U.S.C. 151, the Office mails out a Notice of Allowance which specifies the sum of the issue fee due. When the issue fee amount is changed, the sum specified on the Notice of Allowance is at times different from that required at the time payment is actually received in the Office. If applicants submit issue fee payments in the amount specified on the Notice of Allowance after the effective date of a fee increase, then a balance of issue fee is due. The Office will accept payment of the amount specified on the Notice of Allowance and process the application into a patent. In accordance with 35 U.S.C. 151 and 37 CFR 1.317, a notice is sent to applicants requesting payment of the balance of the issue fee due (the difference between the fee due at time of receipt of payment in the Office and the fee specified on the Notice of Allowance) and setting a three-month period for payment. See *In re Mills*, 12 USPQ2d 1847 (Comm'r Pat. 1989). Failure to pay the balance of the issue fee within the specified three-month period will result in lapse of the patent. Therefore, the reference to October 1, 1982, in § 1.317 is proposed to be replaced by language specifying the consequences of failure to pay the issue fee due at the time payment is made.

Other amendments are proposed to make § 1.317 consistent with the proposed changes in § 1.137. Paragraph (b) of § 1.317 is further proposed to be modified to correct a typographical error. In the reference to fee section 1.17(1), the letter (l) should have appeared instead of the numeral (1).

(6) Delayed payment of maintenance fee (§ 1.378)

Petitions to accept delayed payment of a maintenance fee in an expired patent require a showing of unavoidable delay. In the case of petitions filed more than six months after expiration of a patent, § 1.378(c) further requires a showing that the failure to timely pay the maintenance fee was beyond the control of the patentee. The Office has determined that the "beyond the control" standard does not find adequate support in the relevant statute (35 U.S.C. 41(c)) or in the legislative history of Public Law 97-247. See "Acceptance of Delayed Payment of Maintenance Fees in Expired Patents", 1115 *Off. Gaz. Pat. Office* 18 (June 12, 1990).

Furthermore, the practice of accepting late payment of maintenance fees is proposed to be modified to be more analogous to the practice of reviving abandoned applications and accepting late payment of issue fees. Additionally, the public interest is best served by prompt reinstatement of a patent in which there was an unavoidable or unintentional delay in the timely payment of the maintenance fee.

The requirements for a petition to accept late payment of a maintenance fee, where the delay was unavoidable, are outlined in paragraph (b) of § 1.378. In addition to the maintenance fee and surcharge previously required, paragraph (b) is proposed to be amended to require a petition fee and prompt filing of a petition after the patentee is notified, or otherwise becomes aware, of the expiration of the patent.

The Bill, if enacted, would amend subsection 41(c)(1) of title 35, United States Code, to permit the Commissioner to accept late payment of any maintenance fee filed within eighteen months after the six-month grace period, or within such shorter time as fixed by the Commissioner, if the delay in payment is shown to the satisfaction of the Commissioner to have been unintentional. In order to implement the legislation proposed in the Bill, if enacted, paragraph (c) of § 1.378 is proposed to be modified to permit the filing of a petition to accept late payment of a maintenance fee, where the delay in payment was unintentional.

It is in the public's interest to know as soon as possible if an expired patent will be reinstated. Accordingly, paragraph (c) of § 1.378 is proposed to be amended to permit reinstatement of an unintentionally expired patent, provided that the petition is filed within six months of the end of the grace period specified at 35 U.S.C. 41(b), or within two months of the date patentee became aware of the expiration of the patent, but not later than eighteen months after the grace period.

In addition to the timeliness deadlines set forth in the preceding paragraph, it is proposed that a petition filed under the unintentional standard of § 1.378(c) would have to include the petition fee set forth in § 1.17(m)(3), the required maintenance fee set forth in § 1.20 (e) through (g), the surcharge for an expired patent as set forth in § 1.20(i) and a statement that the delay in timely payment of the maintenance fee was unintentional.

For a transitional period of two months from the date of enactment of the Bill, the requirement, specified in proposed § 1.378(c)(5), that any petition, be filed within six months of the end of the grace period, or within two months of the date patentee became aware of the expiration of the patent, will be waived, sua sponte, pursuant to § 1.183 to allow consideration of any petition filed within eighteen months of the end of the grace period.

If the Bill is not enacted, the proposed changes to §§ 1.17, 1.378(a) and 1.378(c) will not include the changes proposed in the Bill relative to acceptance of late payment of maintenance fees under the unintentional standard.

Other Considerations

The proposed rule change is in conformity with the requirements of the Regulatory Flexibility Act (5 U.S.C. 601 *et seq* .), Executive Orders 12291 and 12612 and the Paperwork Reduction Act of 1980, 44 U.S.C. 3501 *et seq*.

The General Counsel of the Department of Commerce has certified to the Chief Counsel for Advocacy, Small Business Administration, that these proposed rule changes will not have a significant adverse economic impact on a substantial number of small entities (Regulatory Flexibility Act, 5 U.S.C. 605(b)). The principal impact of these proposed changes is to incorporate existing Office policy into the regulations and to provide a more efficient procedure to revive abandoned applications.

The Office has determined that this proposed rule change is not a major rule under Executive Order 12291. The annual effect on the economy will be less than $100 million. There will be no major increase in costs or prices for consumers; individuals; industries; Federal, state or local government agencies; or geographic regions because most of the proposed changes reduce procedural burdens. There will be no significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

The Office has also determined that this notice has no Federalism implications affecting the relationship between the National Government and the States as outlined in Executive Order 12612.

These proposed rule changes contain a collection of information requirements subject to the Paperwork Reduction Act of 1980, 44 U.S.C. 3501 et se., which has previously been approved by the Office of Management and Budget under Control No. 0651-0011.

3. Section 1.137 is proposed to be amended by revising paragraphs (a)-(c) and adding paragraphs (d) and (e) to read as follows:

§ 1.137 Revival of abandoned application.

(a) An application abandoned for failure to prosecute may be revived as a pending application if it is shown to the satisfaction of the Commissioner that the delay was unavoidable. A petition to revive an abandoned application must be promptly filed after the applicant is notified of, or otherwise becomes aware of, the abandonment, and must be accompanied by ▶ :

(1) a proposed response to continue prosecution of that application, or the filing of a continuing application, unless either has been previously filed;

(2) the petition fee as set forth in § 1.17(1); and

(3) a showing that the delay was unavoidable.◀ [a showing of the causes of the delay, by the proposed response unless it has been previously filed, and by the petition fee set forth in § 1.17(1). Such] ▶The◀ showing must be a verified showing if made by a person not registered to practice before the Patent and Trademark Office.

(b) An application unintentionally abandoned for failure to prosecute [, except pursuant to § 1.53(d),] may be revived as a pending application if the delay was unintentional. [A petition to revive an unintentionally abandoned application must be filed within one year of the date on which the application became abandoned or be filed within three months of the date of the first decision on a petition to revive under paragraph (a) of this section which was filed within one year of the date of abandonment of the application.] A petition to revive an unintentionally abandoned application must be [accompanied by] :

(1) ▶accompanied by a proposed response to continue prosecution of that application, or the filing of a continuing application, unless either has been previously filed;

(2) accompanied by the petition fee as set forth in § 1.17(m);

[The three-month period from the date of the first decision referred to in this paragraph may be extended under the provisions of § 1.136(a), but no further extensions under § 1.136(b) will be granted. Petitions to the Commissioner under § 1.183 to waive any time periods for requesting acceptance of an unintentionally delayed payment will not be considered, but will be returned to the applicant.]

(d) Any petition pursuant to [paragraph] ▶paragraphs◀ (b) ▶or (c)◀ of this section not filed within six months of the date of lapse ▶of the patent,◀ must be accompanied by a terminal disclaimer with fee under § 1.321 dedicating to the public a terminal part of the term of the patent equivalent to the period of lapse of the patent.

▶(e) Any request for reconsideration or review of a decision refusing to accept the delayed payment upon petition filed pursuant to paragraphs (b) or (c) of this section, to be considered timely, must be filed within two months of the decision refusing to accept the delayed payment or within such time as set in the decision.

(f) The time periods set forth in this section cannot be extended, except that the three-month period set forth in paragraph (c)(4)(ii) and the time period set forth in paragraph (e) of this section may be extended under the provisions of § 1.136.◀

7. Section 1.378, paragraphs (a), (b), (c) and (e) are proposed to be revised to read as follows:

§ 1.37 Acceptance of delayed payment of maintenance fee in expired patent to reinstate patent.

(a) The Commissioner may accept the payment of any maintenance fee due on a patent after expiration of the patent if, upon petition, the delay in payment of the maintenance fee is shown to the satisfaction of the Commissioner to have been unavoidable [and if the surcharge required by § 1.20(i) is paid as a condition of accepting payment of the maintenance fee] ▶or unintentional◀. If the Commissioner accepts payment of the maintenance fee upon petition, the patent shall be considered as not having expired, but will be subject to the conditions set forth in 35 U.S.C. 41(c)(2).

(b) Any petition to accept [the] ▶an unavoidably◀ delayed payment of a maintenance fee filed under paragraph (a) of this section [within six months of the expiration of the patent] must include:

(1) ▶The petition fee set forth in § 1.17(1)(3);

(2)◀ The required maintenance fee set forth in § 1.20 (e)-(g);

[(2)] ▶(3)◀ The surcharge set forth in § 1.20(i); and

[(3)] ▶(4)◀ A showing that the delay was unavoidable since reasonable care was taken to ensure that the maintenance fee would be paid timely ▶and that the petition was filed promptly after the patentee was notified of, or otherwise became aware of, the expiration of the patent◀. The showing must enumerate the steps taken to ensure timely payment of the maintenance fee ▶the date and the manner in which patentee became aware of the expiration of the patent, and the steps taken to file the petition promptly◀.

(c) Any petition to accept [the] ▶an unintentionally◀ delayed payment of a maintenance fee filed under paragraph (a) of this section [more than six months after the expiration of the patent] must [include] ▶be◀:

(1) ▶accompanied by the petition fee set forth in § 1.17(m)(3);

(2) accompanied by the◀ [The] required maintenance fee set forth in § 1.20 (e)-(g) [,] ▶;◀

[(2)] ▶(3) accompanied by the◀ [The] surcharge set forth in § 1.20(i); [and

(3) A showing that the delay was unavoidable since reasonable care was taken to ensure that the maintenance fee would be paid timely and the failure to timely pay the maintenance fee was due entirely to circumstances outside of the control of the patentee. The showing must enumerate the steps taken to ensure timely payment of the maintenance fee and the circumstances which were outside of the control of the patentee and those acting on behalf of the patentee in paying the maintenance fee. The showing must be sufficient in scope and content to meet the heavy burden of proof required to show that a delay in payment of the maintenance fee of more than six months after expiration of the patent was unavoidable.]

▶(4) accompanied by a statement that the delay was unintentional; and

(5) filed:

(i) within six months of the end of the grace period specified at 35 U.S.C. 41(b); or

(ii) within two months of the date patentee became aware of the expiration of the patent and within eighteen months of the end of the grace period.◀

(d) ***

(e) Reconsideration of a decision refusing to accept a maintenance fee upon petition filed pursuant to paragraph (a) of this section may be obtained by filing a petition for reconsideration within two months of, or such other time as set in, the decision refusing to accept the delayed payment of the maintenance fee. Any such petition for reconsideration must be accompanied by the petition fee set forth in § 1.17(h). After decision on the petition for reconsideration, no further reconsideration or review of the matter will be undertaken by the Commissioner. If the delayed payment of the maintenance fee is not accepted, the maintenance fee and the surcharge set forth in § 1.20(i) will be refunded following the decision on the petition for reconsideration, or after the expiration of the time for filing such a petition for reconsideration, if none is filed. [The] ▶Any petition◀ fee [set forth in § 1.17(h) for filing the petition for reconsideration] ▶under this section◀ will not be refunded unless the refusal to accept and record the maintenance fee is determined to result from an error by the Patent and Trademark Office.

DEPARTMENT OF COMMERCE
Patent and Trademark Office
37 CFR part 1
[Docket No. 920775 - 2175]
RIN 0651-AA44
Changes in Patent Drawing Standards

Agency: Patent and Trademark Office, Commerce

Action: Notice of Proposed Rulemaking

Summary: The Patent and Trademark Office (Office) is proposing to amend the rules of practice regarding patent drawings to adopt international standards and to eliminate unnecessary requirements.

The Office proposes to amend the rules to: (1) revise § 1.84 to provide clarification and adopt international standards; (2) delete § 1.88; (3) delete in § 1.123 the reference to changes by bonded draftsmen since the Office will no longer release drawings from patent applications; (4) revise § 1.152 for design drawings to include the option of submitting black and white photographs in lieu of black ink drawings; and (5) revise § 1.165 for plant patent drawings to eliminate the acceptability of mounted photographs.

Dates: Written comments must be received on or before Oct. 16, 1992 to ensure consideration. An oral hearing will not be conducted.

Address: Address written comments to Office of the Assistant Commissioner for Public Services and Administration, Commissioner of Patents and Trademarks, Washington, D.C. 20231, marked to the attention of Richard A. Bawcombe. Comments may also be sent by facsimile transmission to the attention of Richard A. Bawcombe at (703) 305-8294.

For Further Information Contact: Richard A. Bawcombe by telephone at (703) 305-8594 or by mail marked to his attention and addressed to Commissioner of Patents and Trademarks, Washington, D.C. 20231.

Supplementary Information: Drawings acceptable for patent applications filed outside of the United States are not always acceptable when filed in a patent application filed in the United States. Therefore, the rules relating to drawing requirements are proposed to be amended to enable the Office, when appropriate,

to accept drawings that are capable of clear reproduction for the printing of any resulting patent. Drawings in compliance with the present § 1.84 will be in compliance with proposed § 1.84.

Discussion of Specific Sections to be Changed or Added:

Section 1.17(h) is proposed to be amended to include the appropriate processing fee for accepting color drawings or photographs in utility patent applications as set forth in § 1.84.

Section 1.19(a)(3) is proposed to be amended to change the citation of § 1.84(p) to § 1.84(a)(2) so that § 1.19(a)(4), which sets the fee for colored drawings refers to the proper paragraph of § 1.84 that discusses color drawings.

Section 1.71(d) is proposed to be amended to change the citation of § 1.84(o) to § 1.84(s) because § 1.84(s) specifies how mask work notices should be placed on the drawings.

Section 1.84 is proposed to be revised as follows:

(a) Drawings. This paragraph is proposed to classify drawings into two categories, i.e., black ink and color and delete the limitation that the use of white pigment to cover lines is not normally acceptable. The black ink drawing requirements are proposed to be amended to allow computer-generated drawings to be accepted subject to the same standards applied to pen and ink drawings. Color drawing requirements would be moved from § 1.84(p) to proposed § 1.84(a). Color drawings may be acceptable upon the granting of a petition filed under this paragraph explaining why the color drawings are necessary. A petition is required because the special handling necessary for color drawings is time consuming and the Office cannot permit such a special procedure except in exceptional circumstances. Since utility patents are not printed in color, 5 sets of color drawings are necessary for proper distribution within the Office. One set will be attached to the Letters Patent for routing to the applicant. The remaining four sets will be attached to patent copies for routing to (1) the patent file, (2) the Office of Administrative Services for archival storage at Boyers, Pennsylvania, (3) the plant patent search room for archival storage at the Office, and (4) the Office of Patent and Trademark Information Services for copying purposes.

(b) Photographs. This paragraph is proposed to permit the acceptance of photographs (limited to a single photograph per sheet), upon granting of an applicant's petition. The Office proposes to accept black and white and color photographs or photomicrographs (not photolithographs or other reproductions of photographs made by using screens) developed on double weight photographic paper in lieu of ink drawings. Mounted photographs would not be acceptable. The photographs must be of sufficient quality so that all details in the drawing are reproducible in the printed patent.

(c) Identification of drawings. This paragraph is proposed to be changed and broadened to permit an applicant to provide proper identification information on the reverse side of each sheet of drawings. The identification information allows the Office to match drawing sheets with the proper application. The identification information should include the application number, if known, or the title of the invention, inventor's name, docket number (if any), and name and telephone number of the person to call if the drawings cannot be matched to the proper patent application. The Office will not object if identifying information is not present; however, if the drawings become separated, the Office will not be able to match those drawings to the application. This paragraph is restructured from current § 1.84(1) and revised to state that the preferred placement of the information is on the back side of the drawing sheets.

(d) Graphic forms and drawings. This paragraph is proposed to set standards for chemical and mathematical formulae to align Office standards for formulae, tables, and waveforms with international standards.

(e) Type of paper. This paragraph is proposed as a revision of current § 1.84(a) to set forth the requirement for the type of paper to be used for drawings, including the type of paper for photographs.

(f) Size of paper. This paragraph is proposed to clarify Office requirements set forth in current § 1.84(b) and to provide that color drawings and photographs must be 21.0 cm. by 29.7 cm. (DIN size A4). Other drawings may be any of 3 sizes: 21.0 cm. by 29.7 cm. (DIN size A4), 21.6 cm. by 33.1 cm. (8 1/2 by 13 inches), or 21.6 cm. by 35.6 cm (8 1/2 by 14 inches).

(g) Margins. This paragraph is restructured from current § 1.84(b) to indicate how the size of the paper changes the margin requirements. The Office will accept 3 sizes of paper, however, the sight (i.e. the usable surface) is the same for 2 of the paper sizes, i.e., 21.6 cm. by 33.1 cm. (8 1/2 by 13 inches), or 21.6 cm. by 35.6 cm. (8 1/2 by 14 inches).

(h) Views. This paragraph is proposed to reformat current § 1.84(i) to provide a logical arrangement of the different views provided in the rules, to revise the standards for purposes of clarification, to include the standard for waveforms to show the relative timing, to provide clearer language relative to hatching shown on drawings, to set forth the standard for depicting hatching in sectional views as one view for the purpose of achieving the necessary clarity as sublimentary views maybe added giving a larger-scale of cross-hatching strokes, and to include requirements pertaining to alternate positions. In addition, both Roman and Arabic numerals would be acceptable to designate the section being illustrated.

(i) Arrangement of views. This paragraph is proposed to be relocated from current § 1.84(j) and to be revised to incorporate international standards. In addition, this paragraph is proposed to be changed and broadened to provide placement of words on drawings, as set forth in proposed § 1.84(i). One view is not to be superimposed within the outline of another. The changes expand the possibilities for presenting graphs to conform to standard scientific conventions, while using a format which is compatible with automated patent searching displays. *See 1121 Off. Gaz. Pat. Office* 54 (Dec. 25, 1990) and 1129 *Off. Gaz. Pat. Office* 22 (Aug. 13, 1991).

(j) View for *Official Gazette*. This paragraph is proposed to be relocated from current § 1.84(k).

(k) Scale. This paragraph is proposed to be relocated from current § 1.84(e) and § 1.84(i) and to be revised to indicate that the words "actual size" or "scale 1/2" on the drawings are not permitted since the meaning is lost in reduction/enlargement; and to provide that elements of the same view must be in proportion to each other, unless a difference in proportion is indispensable for the clarity of the view. As a preferred alternative to a difference in proportion within regularly parallel oblique strokes which precludes use illustration of an element from the initial view. When a supplementary view is included, it is recommended that the enlarged element shown in the second view be surrounded by a finely drawn or "dot-dash" circle in the first view pinpointing its location, without obscuring the view.

(l) Character of lines, numbers, and letters. This paragraph is proposed to be relocated from current § 1.84(c) and to be revised to show that lines and strokes of different thicknesses may be used in the same drawing where different thicknesses have different meanings. In addition, this paragraph is proposed to be changed and broadened to indicate that all drawings must be made by a process which will give them satisfactory reproduction characteristics.

(m) Shading. This paragraph is proposed to be changed and broadened to expand definitions for shading and to delete the limitation that drawings transmitted to the Office should be sent flat, protected by a sheet of heavy binder's board, or may be rolled for transmission in a suitable mailing tube. This proposed change would provide the individual practitioner with greater discretion on how to send drawings. In addition, this paragraph is proposed to be relocated from current § 1.84(d) to separate shading requirements from hatching requirements by stating that shading may be used to indicate the surface or shape of spherical, cylindrical, and conical elements of an object, and that spaced lines are preferred for shading purposes. Solid black areas are not permitted, except when used to represent bar graphs or color.

(n) Symbols. This paragraph is proposed to be relocated from current § 1.84(g) to separate symbols requirements from legends requirements and to enlarge the number of acceptable symbols. Known devices should be illustrated by symbols which have a universally-recognized meaning, and which are generally accepted in the art, provided no further detail is essential for understanding the subject matter of the claimed invention. All symbols must be approved by the examiner. Other symbols may be used if they are not likely to be confused with existing conventional symbols and if they are readily identifiable.

(o) Legends. This paragraph is proposed to be relocated from current § 1.84(g) to separate legends requirements from symbols requirements and to be revised to integrate international standards. Where text matter is deemed indispensable for understanding the drawing, a minimum of words should be used. Words should not be used to describe the figure itself, such as "this is a bar graph." All text legends must be approved by the examiner.

(p) Numbers, letters, and reference characters. This paragraph is proposed to be relocated from current § 1.84(f) and to be revised to include numbers and letters in the heading formerly designated "reference characters." This section has been reformatted into five subsections and revised to integrate international standards, where possible. Although the Latin alphabet is used in the international standard, the Office takes the view that the English alphabet is more universally acceptable for letters, except where another alphabet is customarily used, such as the Greek alphabet to indicate angles, wavelengths, and mathematical formulas. In addition, the characters used must be oriented in the same direction as the view so as to avoid having to rotate the sheet. Reference characters should be so arranged to follow the profile of the object depicted.

(q) Lead lines. This paragraph is proposed to integrate international standards, to incorporate brief language which appears in current § 1.84(f), and to change and expand the definition for lead lines. Lead lines are those lines between the reference characters and the details referred to, and they must be executed in the same way as other lines in the drawing.

(r) Arrows. This paragraph is proposed to be relocated from current § 1.84(g) and to be revised to indicate the meaning of the use of arrows, and to show that they may be used at the end of lead lines only if their meaning is clear.

(s) Copyright or mask work notice. This paragraph is proposed to be relocated from current § 1.84(o).

(t) Numbering of sheets of drawings. This paragraph is proposed to be relocated from current § 1.84(n) and to be changed and broadened to allow for the placement of sheet numbers within the sight of the drawing. It is preferable that the sheets be numbered with two Arabic numerals placed on either side of an oblique line, with the first number being the sheet number and the second the total number of sheets of drawings.

(u) Numbering of views. This paragraph is proposed to be relocated from current § 1.84(i) and, for clarity, to be separately identified in this new section. Use of the abbreviation "FIG." must precede all view numbers.

(v) Security markings. This paragraph is proposed to be relocated from current § 1.84(1) to provide that security markings may be placed on the drawings if they are outside the sight and preferably centered in the top margin.

(w) Corrections. This paragraph is proposed to provide that any corrections made on drawings submitted to the Office must be durable and permanent. The language is revised from current § 1.84(a) which prohibits the use of white pigment to cover lines.

(x) Holes. This paragraph is proposed to be relocated from current § 1.84(b) to permit two holes to be punched in the top margin of the drawings with their centerlines spaced 7.0 cm. (2 3/4 inches) apart.

Section 1.88 is proposed to be removed and reserved since the changes effective January 1, 1991, in § 1.85(b) make the regulation regarding the transfer of drawings unnecessary. Since the Office no longer releases drawings from patent applications, generally applicants are retaining the master copy of the drawings. Accordingly, applicants can easily file a copy of drawings in an application and therefore eliminate the need for the office to transfer drawings. Any situations which prevent a hardship to applicants may be accomodated by the filing of a petition under § 1.182 requesting the transfer of the drawings.

Section 1.123 prescribes procedures for amending drawings. With the adoption of new rules for amending drawings effective January 1, 1989, the Office no longer requires the submission of formal drawings upon filing a patent application. See 1097 *Off. Gaz. Pat. Office* 36 (Dec. 13, 1988). Since corrections are the responsibility of the applicant, the original drawing(s) should be retained by the applicant for future correction, if necessary.

As a result of adoption of the new rules in 1989 relating to drawings, the Office will no longer release to applicants, bonded drafting companies or others, drawings from patent applications. Effective January 1, 1991, § 1.85(b) prohibits release of drawings from all patent applications. Accordingly, it is proposed that the reference to changes by bonded draftsmen be deleted from § 1.123.

Section 1.152 is proposed to be revised to provide that photographs and ink drawings must not be combined in one design application. The reason for this requirement is to avoid inconsistencies between the photograph and the drawing, and further eliminate views that may distort the proportionate relationship between the corresponding elements on the drawing and the photograph. It is also proposed that all design photographs be limited to the design claimed and not include environmental structure. It is proposed that color drawings and color photographs not be permissible in design patent applications. Solid black surface shading is inappropriate on a design drawing, but is acceptable when used to represent color contrast.

Section 1.165 is proposed to be revised to provide that plant patent drawings must comply with the requirements of § 1.84. It is proposed that the current exception that plant patent drawings do not automatically require view numbers and reference characters be maintained. It is also proposed that mounted color photographs would not be acceptable in plant patent applications.

Other Considerations:

The proposed rule change is in conformity with the requirements of the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*), Executive Orders 12291 and 12612, and the Paperwork Reduction Act of 1980, 44 U.S.C. 3501 *et seq.*

The General Counsel of the Department of Commerce has certified to the Chief Counsel for Advocacy, Small Business Administration, that these proposed rule changes will not have a significant adverse economic impact on a substantial number of small entities (Regulatory Flexibility Act, 5 U.S.C. 605(b)). The principal impact of these proposed changes is to revise and reformat the drawing standards to adopt international standards, to the extent possible, and to facilitate access to sections through inclusion of pertinent subsection headings, which should be helpful to small entities.

The Office has determined that this proposed rule change is not a major rule under Executive Order 12291. The annual effect on the economy will be less than $100 million. There will be no major increase in costs or prices for consumers, individuals, industries, Federal, state or local government agencies, or geographic regions because most of the proposed changes reduce procedural burdens. There will be no adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

The Office has also determined that this notice has no Federalism implications affecting the relationship between the National Government and the States as outlined in Executive Order 12612.

These proposed rule changes contain a collection of information requirements subject to the Paperwork Reduction Act of 1980, 44 U.S.C. 3501 *et seq.*, which has previously been approved by the Office of Management and Budget under Control No. 0651-0011.

(d) A copyright or mask work notice may be placed in a design or utility patent application adjacent to copyright and mask work material contained therein. The notice may appear at any appropriate portion of the patent application disclosure. For notices in drawings, see § 1.84([o]▶s◀). The content of the notice must be limited to only those elements ▶provided for◀ [required]by law. For example, "©1983 John Doe" (17 U.S.C. 401) and "*M* John Doe" (17 U.S.C. 909) would be properly limited and, under current statutes, legally sufficient notices of copyright and mask work, respectively. Inclusion of a copyright or mask work notice will be permitted only if the authorization language set forth in paragraph (e) of this section is included at the beginning (preferably as the first paragraph) of the specification.

* * * * *

5. Section 1.84 is proposed to be revised to read as follows:

§ 1.84. Standards for drawings.

▶(a) *Drawings*. There are two acceptable categories for presenting drawings in utility patent applications:

(1) *Black ink*. Black and white drawings are normally required. India ink, or its equivalent in quality, must be used for drawings to secure black solid lines.

(2) *Color*. On rare occasions, color drawings may be necessary as the only practical medium by which to disclose the subject matter sought to be patented in utility patent applications or to be the subject matter of a Statutory Invention Registration (SIR). The Patent and Trademark Office will accept color drawings in utility patent applications and SIR's only after granting a petition filed under this paragraph explaining why the color drawings are necessary. Any such petition must include the following:

(i) The appropriate fee set forth in § 1.17(h);

(ii) Five (5) sets of color drawings on 21.0 by 29.7 cm. (DIN size A4) sheets; and

(iii) If the specification does not address color drawings, the following language is to be inserted as the first paragraph in that portion of the specification relating to the brief description of the drawing:

The file of this patent contains at least one drawing executed in color. Copies of this patent with color drawing(s) will be provided by the Patent and Trademark Office upon request and payment of the necessary fee.

If the above language is not in the specification, a proposed amendment to insert the language must accompany the petition.

(b) *Photographs*.

(1) *Black and white*. Photographs are not ordinarily permitted in utility and design patent applications. However, the Office will accept photographs in utility and design patent applications only after granting a petition, filed under this paragraph which requests that photographs be accepted. Any such petition must include the following:

(i) The appropriate fee set forth in § 1.17(h); and

(ii) Five (5) sets of photographs on 21.0 by 29.7 cm. (DIN size A4) sheets. Photographs must be developed on double weight photographic paper. Mounted photographs are not acceptable. No more than one photograph per sheet will be permitted. The photographs must be of sufficient quality so that all details in the drawing are reproducible in the printed patent.

(2) *Color*. Color photographs will be accepted in utility patent applications if the conditions for accepting color drawings have been satisfied. See paragraph (a)(2) of this section.

(c) *Identification of drawings*. Identifying indicia, if provided, should include the application number or the title of the invention, inventor's name, docket number (if any), and the name and telephone number of a person to call. This information should be placed on the back of each sheet of drawings a minimum distance of 1.5 cm. (5/8 inch) down from the top of the page.

(d) *Graphic forms in drawings*. Chemical or mathematical formulae, tables, and waveforms may be submitted as drawings, and are subject to the same requirements as drawings. Each chemical or mathematical formula must be labeled as a separate figure, using brackets when necessary, to show that information is properly integrated. Each group of waveforms must be presented as a single figure, using a common vertical axis with time extending along the horizontal axis. Each individual waveform discussed in the specification must be identified with a separate letter designation adjacent to the vertical axis.

(e) *Type of paper*. Drawings submitted to the Office must be made upon paper which is flexible, strong, white, smooth, nonshiny, and durable. All sheets must be free from cracks, creases, and folds. Only one side of the sheet shall be used for the drawing. Each sheet must be reasonably free from erasures and must be free from alterations, overwritings, and interlineations. Photographs must be on double weight photographic paper. See paragraph (b) of this section for other requirements for photographs.

(f) *Size of paper*. All drawing sheets in an application must be the same size, except that color drawings or photographs which are required to be DIN size A4 may differ in size from the other sheets. One of the shorter sides of the sheet is regarded as its top. The size of the sheets on which drawings are made must be:

(1) 21.6 cm. by 35.6 cm. (8 1/2 by 14 inches),
(2) 21.6 cm. by 33.1 cm. (8 1/2 by 13 inches), or
(3) 21.0 cm. by 29.7 cm. (DIN size A4).

(g) *Margins*. The sheets must not contain frames around the sight, i.e., the usable surface.

(1) On 21.6 cm. by 35.6 cm. (8 1/2 by 14 inch) drawing sheets, each sheet must include a top margin of 5.1 cm. (2 inches), and bottom and side margins of 6.4 mm. (1/4 inch) from the edges, thereby leaving a sight precisely 20.3 cm. by 29.8 cm. (8 by 11 3/4 inches).

(2) On 21.6 cm. by 33.1 cm. (8 1/2 by 13 inch) drawing sheets, each sheet must include a top margin of 2.5 cm. (1 inch) and bottom and side margins of 6.4 mm. (1/4 inch) from the edges, thereby leaving a sight precisely 20.3 cm. by 29.8 cm. (8 by 11 3/4 inches).

(3) On 21.0 cm. by 29.7 cm. (DIN size A4) drawing sheets, each sheet must include a top margin of at least 2.5 cm., a left side margin of 2.5 cm., a right side margin of 1.5 cm., and a bottom margin of 1.0 cm., thereby leaving a sight precisely 17.0 cm. by 26.2 cm.

(h) *Views*. The drawing must contain as many views as necessary to show the invention. The views may be plan, elevation, section, or perspective views; and detail views of portions of elements, on a larger scale, if necessary, may also be used. All views of the drawing must be grouped together and arranged on the sheet(s) without wasting space, preferably in an upright position, clearly separated from one another, and must not be included in the sheets containing the specifications, claims, or abstract. Views must not be connected by projection lines and must not contain center lines. Waveforms of electrical signals may be connected by dashed lines to show the relative timing of the waveforms.

(1) *Exploded views*. Exploded views, with the separated parts of the same view embraced by a bracket, to show the relationship or order of assembly of various parts are permissible. When an exploded view is shown in a figure which is on the same sheet as another figure, the exploded view should be placed in brackets.

(2) *Partial views*. When necessary, a view of a large machine or device in its entirety may be broken into partial views on a single sheet, or extended over several sheets if there is no loss in facility of understanding the view. Partial views drawn on separate sheets must always be capable of being linked edge to edge so that no partial view contains parts of another partial view. A smaller scale view should be included showing the whole formed by the partial views and indicating the positions of the parts shown. When a portion of a view is enlarged for magnification purposes, the view and the enlarged view must each be labeled as separate views.

(i) Where views on two or more sheets form in effect a single complete view, the views on the several sheets must be so arranged that the complete figure can be assembled without concealing any part of any of the views appearing on the various sheets.

(ii) A very long view may be divided into several parts placed one above the other on a single sheet. However, the relationship between the different parts must be clear and unambiguous.

(3) *Sectional views*. The plane upon which a sectional view is taken should be indicated on the view from which the section is cut by a broken line, the ends of which should be designated by Arabic or Roman numerals corresponding to the view number of the sectional view, and have arrows applied to indicate the direction of sight. Hatching must be used to indicate section portions of an object, and must be made by regularly spaced oblique parallel lines spaced sufficiently apart to enable the lines to be distinguished without difficulty. Hatching should not impede the clear reading of the reference characters and lead lines. If it is not possible to place reference characters outside the hatched area, the hatching may be broken off wherever reference characters are inserted. Hatching must be at a substantial angle to the surrounding axes or principal lines, preferably 45°. A cross-section must be set out and drawn to show all of the materials as they are shown in the view from which the cross-section was taken. The parts in cross-section must show proper material(s) by hatching with regularly spaced parallel oblique strokes, the space between strokes being chosen on the basis of the total area to be hatched. The various parts of a cross-section of the same item should be hatched in the same manner and should accurately and graphically indicate the nature of the material(s) that is illustrated in cross section. The hatching of juxtaposed different elements must be angled in a different way. In the case of large areas, hatching may be confined to an edging drawn around the inside of the outline of the area to be hatched. Different types of hatching should have different conventional meanings as regards the nature of a material seen in cross-section.

(4) *Alternate position*. A moved position may be shown by a broken line superimposed upon a suitable view if this can be done without crowding; otherwise, a separate view must be used for this purpose.

(5) *Modified forms*. Modified forms of construction must be shown in separate views.

(i) *Arrangement of views*. One view must not be placed upon another or within the outline of another. All views on the same sheet should stand in the same direction and, if possible, stand so that they can be read with the sheet held in an upright position. If views longer than the width of the sheet are necessary for the clearest illustration of the invention, the sheet may be turned on its side so that the top of the sheet, with the appropriate top margin to be used as the heading space, is on the right-hand side. Words must appear in a horizontal, left-to-right fashion when the page is either upright or turned so that the top becomes the right side, except for graphs utilizing standard scientific convention to denote the axis of abscissas (of X) and the axis of ordinates (of Y).

(j) *View for Official Gazette*. One of the views should be suitable for publication in the *Official Gazette* as the illustration of the invention.

(k) *Scale*.

(l) The scale to which a drawing is made must be large enough to show the mechanism without crowding when the drawing is reduced in size to two-thirds in reproduction. Views of portions of the mechanism on a larger scale should be used when necessary to show details clearly. Two or more sheets may be used if one does not give sufficient room. The number of sheets should be kept to a minimum.

(2) When approved by the examiner, the scale of the drawing may be graphically represented. Indications such as "actual size" or "scale 1/2" on the drawings, are not permitted, since these lose their meaning with reproduction in a different format.

(3) Elements of the same view must be in proportion to each other, unless a difference in proportion is indispensable for the clarity of the view. Instead of showing elements in different proportion, a supplementary view may be added giving a larger-scale illustration of the element of the initial view. It is recommended that the enlarged element shown in the second view be surrounded by a finely drawn or "dot-dash" circle in the first view pinpointing its location without obscuring the view.

(l) *Character of lines, numbers, and letters*. All drawings must be made by a process which will give them satisfactory reproduction characteristics. Every line, number, and letter must be durable, clean, sharp, black (except for color drawings), sufficiently dense and dark, and uniformly thick and well-defined. The weight of all lines and letters must be heavy enough to permit adequate reproduction. This direction applies to all lines however fine, to shading, and to lines representing cut surfaces in sectional views. Lines and strokes of different thicknesses may be used in the same drawing where different thicknesses have a different meaning.

(m) *Shading*. The use of shading in views is encouraged if it aids in understanding the invention and if it does not reduce legibility. Shading is used to indicate the surface or shape of spherical, cylindrical, and conical elements of an object. Flat parts may also be lightly shaded. Such shading is preferred in the case of parts shown in perspective, but not for cross-sections. Spaced lines for shading are preferred. These lines must be thin, as few in number as practicable, and they must contrast with the rest of the drawings. As a substitute for shading, heavy lines on the shade side of objects can be used except where they superimpose on each other or obscure reference characters. Light should come from the upper left corner at an angle of 45°. Surface delineations should preferably be shown by proper shading. Solid black shading areas are not permitted, except when used to represent bar graphs or color.

(n) *Symbols*. Graphical drawing symbols may be used for conventional elements when appropriate, subject to approval by the Office. The elements for which such symbols and labeled representations are used must be adequately identified in the

specification. Known devices should be illustrated by symbols which have a universally-recognized conventional meaning and are generally accepted in the art provided no further detail is essential for understanding the subject matter of the claimed invention. Other symbols may be used if they are not likely to be confused with existing conventional symbols, and if they are readily identifiable.

(o) *Legends.* Suitable descriptive legends may be used, subject to approval by the Office. They should contain as few words as possible.

(p) *Numbers, letters, and reference characters.*

(1) Reference characters (numerals are preferred), sheet numbers, and view numbers must be plain and legible, and must not be used in association with brackets, inverted commas, or enclosed within outlines, e.g., encircled. They must be oriented in the same direction as the view so as to avoid having to rotate the sheet. Reference characters should be arranged to follow the profile of the object depicted.

(2) The English alphabet must be used for letters, except where another alphabet is customarily used, such as the Greek alphabet to indicate angles, wavelengths, and mathematical formulas.

(3) Numbers, letters, and reference characters must measure at least 3.2 mm. (1/8 inch) in height. They should not be placed in the drawing so as to interfere with its comprehension. Therefore, they should not cross or mingle with the lines. They should not be placed upon hatched or shaded surfaces. When necessary, a blank space may be left in the hatching or shading where the character occurs so that it appears perfectly distinct.

(4) The same part of an invention appearing in more than one view of the drawing must always be designated by the same reference character, and the same reference character must never be used to designate different parts.

(5) Reference characters not mentioned in the description shall not appear in the drawings. Reference characters mentioned in the description must appear in the drawings.

(q) *Lead lines.* Lead lines are those lines between the reference characters and the details referred to. Such lines may be straight or curved and should be as short as possible. They must originate in the immediate proximity of the reference character and extend to the feature indicated. Lead lines must not cross each other. Lead lines are required for each reference character except for those which indicate the surface or cross-section on which they are placed. Such a reference character must be underlined to make it clear that a lead line has not been left out by mistake. Lead lines must be executed in the same way as lines in the drawing.

(r) *Arrows.* Arrows may be used at the ends of lines, provided that their meaning is clear, as follows:

(1) On a lead line, a freestanding arrow to indicate the entire section towards which it points;

(2) On a lead line, an arrow touching a line to indicate the surface shown by the line looking along the direction of the arrow; or

(3) To show the direction of movement.

(s) *Copyright or Mask Work Notice.* A copyright or mask work notice may appear in the drawing, but must be placed within the sight of the drawing immediately below the figure representing the copyright or mask work material and be limited to letters having a print size of 3.2 mm. to 6.4 mm. (1/8 to 1/4 inches) high. The content of the notice must be limited to only those elements provided for by law. For example, "©1983 John Doe" (17 U.S.C. 401) and "*M* John Doe" (17 U.S.C. 909) would be properly limited and, under current statutes, legally sufficient notices of copyright and mask work, respectively. Inclusion of a copyright or mask work notice will be permitted only if the authorization language set forth in § 1.71(e) is included at the beginning (preferably as the first paragraph) of the specification.

(t) *Numbering of sheets of drawings.* The sheets of drawings should be numbered in consecutive Arabic numerals within the sight as defined in paragraph (g) of this section. These numbers, if present, must be placed in the middle of the top of the sheet, but not in the margin. The numbers can be placed on the right-hand side if the drawing extends too close to the middle of the top edge of the usable surface. The drawing sheet numbering must be clear and larger than the numbers used as reference characters to avoid confusion. Sheets of drawings must be paginated from 1 onward. The number of each sheet should be shown by 2 Arabic numerals placed on either side of an oblique line, with the first being the sheet number, and the second being the total number of sheets of drawings, with no other marking.

(u) *Numbering of views.*

(1) The different views must be numbered in Arabic numerals consecutively, starting with 1, independent of the numbering of the sheets and, if possible, in the order in which they appear on the drawing sheet(s). Partial views intended to form one complete view, on one or several sheets, must be identified by the same number followed by a capital letter. View numbers must be preceded by the abbreviation "FIG. Where a single view is used to illustrate the claimed invention, it must not be numbered and the abbreviation "FIG."must not appear.

(2) Numbers and letters identifying the views must be simple and clear and must not be used in association with brackets, circles, or inverted commas. The view numbers must be larger than the numbers used for reference characters.

(v) *Security markings.* Authorized security markings may be placed on the drawings provided they are outside the sight, preferably centered in the top margin.

(w) *Corrections.* Any corrections on drawings submitted to the Office must be durable and permanent.

(x) *Holes.* The drawing sheets may be provided with 2 holes in the top margin. The holes should be equally spaced from the respective side edges, and their centerlines should be spaced 7.0 cm. (2 3/4 inches) apart.

(See § 1.152 for design drawings, § 1.165 for plant drawings, and § 1.174 for reissue drawings.)◀

6. Section 1.88 is proposed to be removed and reserved as follows:

§ 1.88 ▶[Reserved]◀ [Use of old drawings.]

[If the drawings of a new application are to be identical with the drawings of a previous application of the applicant on file in the Office, or with part of such drawings, the old drawings or any sheets thereof may be used if the prior application is, or is about to be, abandoned, or if the sheets to be used are cancelled in the prior application. The new application must be accompanied by a letter requesting the transfer of the drawings, which should be completely identified.]

7. Section 1.123 is proposed to be revised to read as follows:

§1.123 Amendments to the drawing.

No change in the drawing may be made except by permission of the Office. Permissible changes in the construction shown in any drawing may be made only by [bonded draftsmen, at applicants expense, or by]the submission of ▶a◀ substitute [drawings] ▶drawing◀ by applicant. A sketch in permanent ink showing proposed changes, to become part of the record, must be filed for approval by the examiner and should be a separate paper.

8. Section 1.152 is proposed to be revised to read as follows:

§ 1.152 ▶Design◀ Drawing.

The design must be represented by a drawing ▶that complies◀[made in conformity]with the▶requirements of § 1.84◀ [rules laid down for drawings of mechanical inventions] ▶,◀ and must contain a sufficient number of views to constitute a complete disclosure of the appearance of the article. Appropriate surface shading must be used to show the character or contour of the surfaces represented. ▶Solid black surface shading is not permitted except when used to represent color contrast.◀ Broken lines may be used to show visible environmental structure, but may not be used to show hidden planes and surfaces which cannot be seen through opaque materials. ▶Alternate positions of a design component, illustrated by full and broken lines in the same view are not permitted in a design drawing. Photographs and ink drawings must not be combined in one application. Photographs submitted in lieu of ink drawings in design patent applications must comply with § 1.84(b) and must not disclose environmental structure but must be limited to the design claimed. Color drawings and color photographs are not permitted in design patent applications.◀

9. Section 1.165 is proposed to be revised to read as follows:

§ 1.165 ▶Plant◀ Drawings.

(a) Plant patent drawings [are not mechanical drawings and]should be artistically and competently executed. [.Figure] ▶and must comply with the requirements of § 1.84. View◀ numbers and reference characters need not be employed unless required by the examiner. The drawing must disclose all the distinctive characteristics of the plant capable of visual representation.

(b) The drawing may be in color and when color is a distinguishing characteristic of the new variety, the drawing must be in color. Two copies of color drawings ▶or color photographs◀ must be submitted. [Color drawings may be made either in permanent water color or oil, or in lieu thereof may be photographs made by color photography or properly colored on sensitized paper. Permanently mounted color photographs are acceptable. The paper in any case must correspond in size, weight and quality to the paper required for other drawings. See § 1.84.]

SPECIAL BOXES FOR MAIL

Special PTO mail box numbers should be used to allow forwarding of particular types of mail to the appropriate areas as quickly as possible. Such mail is forwarded directly to the appropriate area without being opened. Only the specified type of document should be placed in an envelope addressed to one of these boxes. If any documents other than the specified type identified for each box are addressed to that box, they will be delayed in reaching the appropriate area for which they are intended.

The following special boxes should be used only for their specified purpose. Address mail as follows:

Reference Collections of U.S. Patents and Trademarks
Available for Public Use in Patent and Trademark Depository Libraries

The following libraries, designated as Patent and Trademark Depository Libraries (PTDLs), receive patent and trademark information in various formats from the U.S. Patent and Trademark Office. Many PTDLs have on file all full-text patents issued since 1790, trademarks published since 1872, and select collections of foreign patents. All PDTLs have both the patent and trademark sections of the *Official Gazette of the U. S. Patent and Trademark Office*. The full-text utility and design patents are distributed numerically on 16 mm microfilm, and plant patents on color microfiche. Patent and trademark search systems on CD-ROM (Compact Disc-Read Only) format are available at all PTDLs to increase utilization of and enhance access to the information found in patents and trademarks. It is through the CD-ROM systems that prelminary patent and trademark searches can be conducted through the numerically arranged collections. All information is available for use by the public free of charge.

In addition, each PTDL offers reference publications which outline and provide access to the patent and trademark classification systems, as well as other documents and publications which supplement the basic search tools. PTDLs provide technical staff assistance in using all materials. Facilities for making paper copies of patent and trademark information are generally provided for a fee.

Since there are variations in the scope of patent and trademark collections among the PTDLs, and their hours of service to the public vary, anyone contemplating use of these collections at a particluar library is urged to contact that library in advance about its collections, services, and hours in order to avert possible inconvenience.

Plant Patents ..... 3,776 to 3,791

MARKS PUBLISHED FOR OPPOSITION

The following marks are published in compliance with section 12(a) of the Trademark Act of 1946. Applications for the registration of marks in more than one class have been filed as provided in section 30 of said act as amended by Public Law 772, 87th Congress, approved Oct. 9, 1962, 76 Stat. 769. Opposition under section 13 may be filed within thirty days of the date of this publication. See rules 2.101 to 2.105.

A separate fee of two hundred dollars for opposing each mark in each class must accompany the opposition.

SECTION 1.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).

SECTION 2.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).

SECTION 1.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).

SECTION 2.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).

TRADEMARK REGISTRATIONS AMENDED, CORRECTED, ETC.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).

Any change to the registration will be indicated at the bottom of each entry under ELEMENTS AMENDED, CORRECTED OR RESTRICTED. With the exception of changes to the goods and services, additions to the registration will appear in asterisks and deletions of the registration will appear in brackets. Elements which are only changed will be listed with no punctuation. As to the goods/services statement, amendments to the goods/services will appear in asterisks and deletions will appear in brackets. In addition if any change to the goods/services occurs, the element "Goods/Services" will be listed under ELEMENTS AMENDED, CORRECTED OR RESTRICTED.
